

Progress of CHAI's activities in Mesoamerica and Hispaniola

Washington DC

September 26, 2014

Agenda

Haiti

Guatemala

Honduras

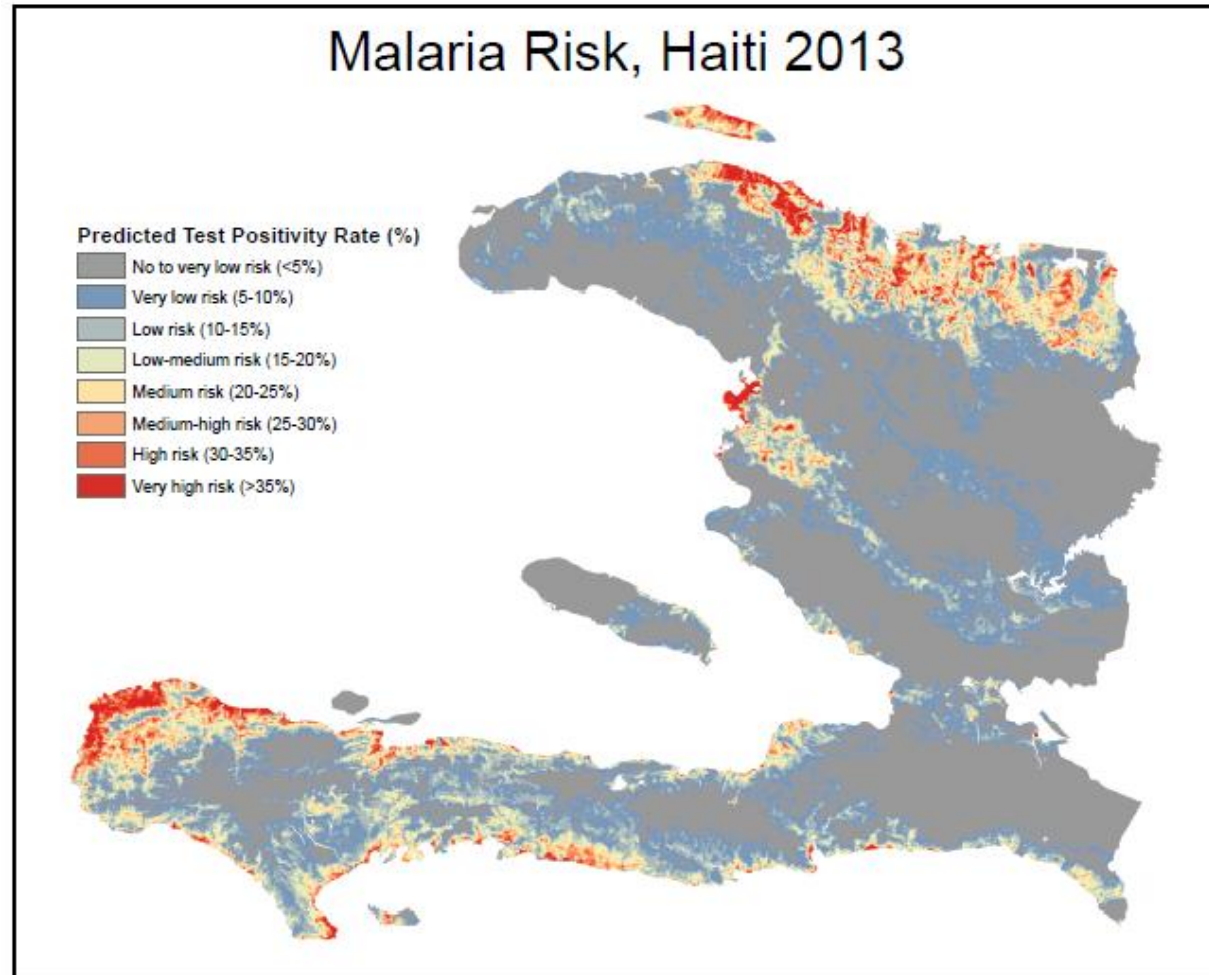

Central America and Hispaniola

Haiti NSP for elimination soon to be finalized

	Activities done so far	Next Steps for CHAI
National Strategic Plan	<p>CHAI worked jointly with PNCM in developing a 1st draft</p> <ul style="list-style-type: none">• Technical committee formed (PNCM, PSI, MoH, CDC)• Workshop with CDC, PAHO, Carter Center• Pending to finalize indicators and costing (Aug)	<p>Finalize NSP</p> <ul style="list-style-type: none">• Help for review indicators and final plan (Sep- Oct)• TA for costing the NSP (Program Manager in country with remote support from Finance Team and Regional Manager)
Risk Map	<p>Risk map with data as of 2012</p> <ul style="list-style-type: none">• Feasibility Analysis• Initial strategies for elimination	<p>Update map with data as of 2013</p> <ul style="list-style-type: none">• Use NSSS and HSIS data as of 2013 (Oct)
Concept note		<p>Support the development of the concept note</p> <ul style="list-style-type: none">• CHAI to work with PNCM key partners in concept note through CHAI's Program Manager with support from Global team and Reg. Manager

Updated risk map will help to prioritize interventions

- Where to apply vector control initiatives
- Which areas are exporting or importing cases
- Where it makes sense to think on targeted drug interventions

Agenda

Haiti

Guatemala

Honduras

Central America and Hispaniola

CHAI is supporting Guatemala's NMCP to develop its first risk maps

Activities done so far

Next Steps for CHAI

Risk Map

CHAI developed a first descriptive map for 2009-2012

- Data level as of municipalities
- Source of data: Epidemiology department
- Important # of municipalities did not report data in 2012

Develop a first risk map

- Update descriptive map using 2013 data
- Develop first-ever risk map to be used for strategic planning

National Strategic Plan

First workshop on Aug 26th and next session in Oct 22nd

- Focus of 1st workshop was to re-orient national strategy from control towards elimination

NSP ready by end of 2014

- CHAI will participate throughout all process including costing (country associate)

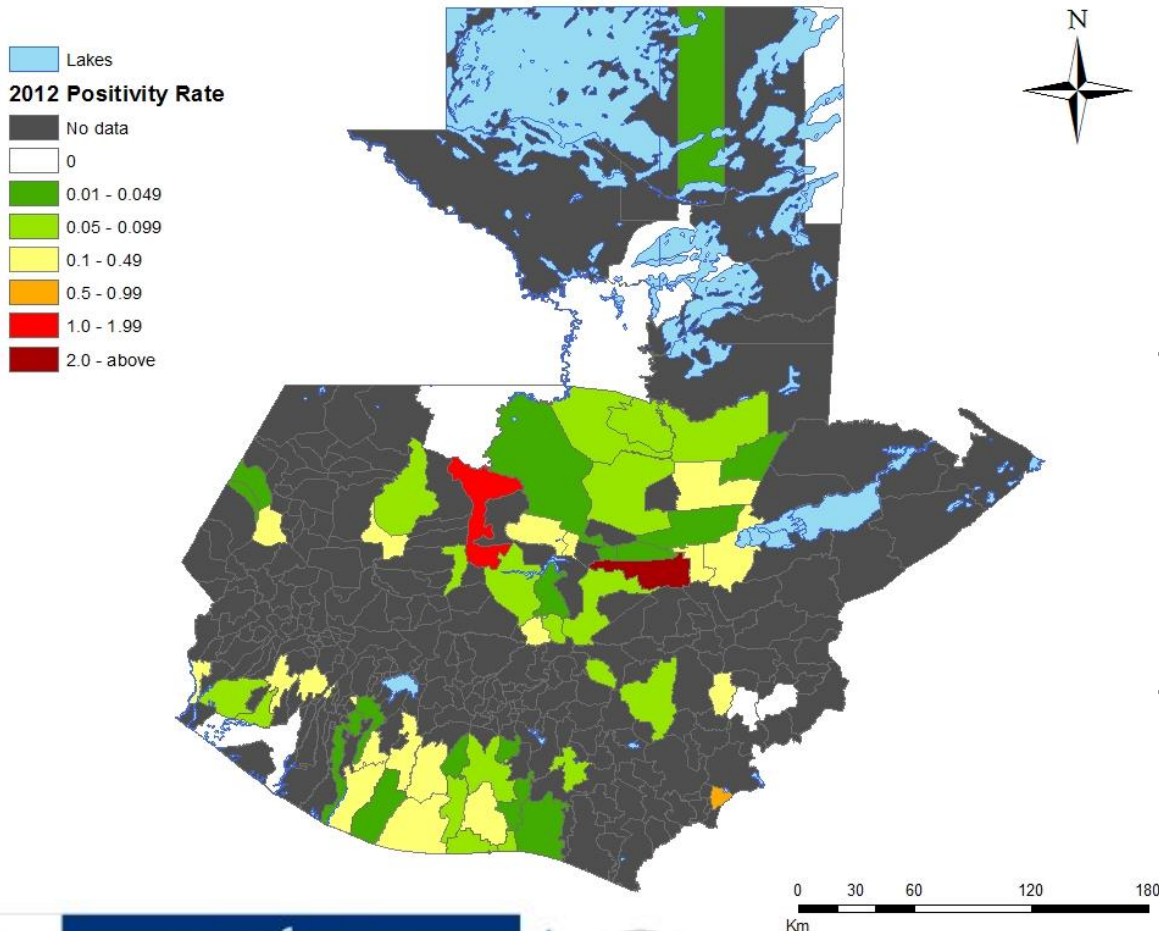

Surveillance system

Understanding if previous endemic areas have zero cases or not reporting

- Regions such as Izabal and Zacapa are not reporting in 2012 but they did in 2009-2011

First step towards a risk map in Guatemala

Data as of year 2012

- Descriptive map is helping the country to understand the gaps in surveillance system
- Risk map will be used in NSP to determine interventions
- There is the need to produce a risk map (first one in the country) to better target elimination interventions

Agenda

Haiti

Guatemala

Honduras

Central America and Hispaniola

Risk map has been defined as first priority in Honduras

Activities done so far

Data collection conducted to gather information for risk map

CHAI started modeling information from MoH and other main partners

- Data level as of municipalities
- Small % of data at case management level
- Gap in georeferentiation at community level

Next Steps for CHAI

Produce an initial risk map

- First exercise to include data as of 2013 (Nov-Dec)
- Road map for a refined risk map will be produced

Risk Map

Mobility map

Surveillance system

Cross border collaboration

Internal and borderline mobility with Nicaragua

- To develop a mobility map (2015)

Understanding if previous endemic areas have zero cases or not reporting

- Regions TBD with the NMCP

Bi-lateral interventions with Nicaragua (indigenous population)

Agenda

Haiti

Guatemala

Honduras

Other countries in Central America and Hispaniola

CHAI is supporting various other governments to reorient towards elimination

Panama

Indigenous population approach: CHAI will do an assessment about malaria efforts and situation in Guna Yala indigenous community with the NMCP

Mobility: understanding human mobility in indigenous communities

Costa Rica

TA to be defined: NMCP has requested a visit to the country in October

Initial interest in diagnostics: TBD scope of TA

Other countries in CA

El Salvador: Initial interest in strategic planning. TBD

Belize: TBD

Nicaragua: Interested has been expressed by the country but still no progress in coordinating a visit from high level authorities

Other countries in Hispaniola

Dom. Republic: TBD if risk map is still a need for the country (initially identified as first activity to do)
